Eastern Report *By Director Mike Locketell*

Extreme Weather Wrecks Fall Rebloom

Spring weather particularly in May had a major impact on cool season fall rebloom quantity and quality for Central Virginia in 2016. The Richmond area established a new record for May rainfall. Our Piedmont red clay soils became super-saturated. Clump division in the summer revealed devastating damage. Few healthy roots existed on each rhizome.

Unless rebloom advocates understood the carnage, expectations for fall flowering would be a major disappointment. The picture became quite clear at my display planting at BP Market in South Richmond. Even though clumps were NOT regularly watered, there were sufficient mature rhizomes for rebloom. Dropping air temperatures below the 60°F threshold in late September did not trigger bloomstalk formation. Significant flowering did not occur until early November. The public had a scant two and half week window to enjoy bloom. A huge letdown!!

A similar script unfolded at J. Sargeant Reynolds Community College (JSRCC), Goochland County, VA. Despite being five degrees cooler, many reliable varieties in all bearded classes refused to bloom until early November. My JSRCC trial beds were at peak flowering for about a week before Jack Frost stopped by to put an abrupt end to the show. Some bloomstalks were cut for indoor viewing. It was great fun to show and discuss specimens at the Central Virginia Iris Society's Harvest Dinner on November 19th.

My plantings at JSRCC always offer a few exceptions to the rule. TB REs '**Golden Encore**' (*F.P. Jones 1973*), '**Lunar Whitewash**' (*S. Innerst 2003*), '**Over And Over**' (*S. Innerst 2001*) and '**Soda Fountain Shuffle**' (*M. Locketell 2015*) turned in solid fall performances. They bloomed throughout October into November. On the median side, SDB RE '**Baby Blessed**' (*L. Zurbrigg 1979*) and MTB RE '**Lady Emma**' (*F.P. Jones 1986*) stole the show. The above rebloom selections were in flower for the CVIS picnic on October 15th.

A few seedlings at the Goochland County, VA location deserve mention. **Wilkerson TB RE Sdlg. #1810-15Re** was in constant bloom through the fall. **Locketell TB RE Sdlg. #21219-1Re** (*Over And Over X Daughter Of Stars*) flowered on two bloomstalks from mid-October to first frost. The red plicata will be closely watched for further improvement in the upcoming growing season. Another surprising seedling was **Locketell SDB RE Sdlg. #21245-3Re** (*Senorita Frog X Sailboat Bay*). Flowers on this median seedling appeared from early October until early November. Will it improve under more favorable growing conditions? Another lingering question to be answered this fall.

Cool season rebloom was felt in Pennsylvania. Carmen Costalas from Stroudsburg, PA had fall flowering on TB REs '**Brother Carl**' (*L. Zurbrigg 1983*), '**Pink Attraction**' (*E. Hall 1988*), and '**Westward Ho**' (*H. Waterer 1929*). George Hillenbrandt had his Slatington, PA garden on tour for the 2016 AIS National Convention. A friend for cool season rebloom, George managed to find fall bloom in October on TBs '**Again And Again**' (*S. Innerst 1999*), '**Just Call Me**' (*B. Wilkerson 2008*), '**Lunar Whitewash**' (*S. Innerst 2003*), and '**Over And Over**' (*S. Innerst 2001*). Fall flowering was also encountered on SDB RE '**Baby Blessed**' (*L. Zurbrigg 1979*). Hillenbrandt had to contend with a drought in his micro-climate, so rebloom clumps did receive supplemental watering. Ten additional varieties had buds eliminated by frost. Fortunes will hopefully improve in 2017.

Ruth Harding from Pittsburgh, PA emailed me a report in mid-January. She had summer flowering on TB '**Champagne Elegance**' (*O.D. Niswonger 1987*) from late June through mid-July. Harding also enjoyed lengthy rebloom on TB RE '**Pink Attraction**' (*E. Hall 1988*) from early September through mid-October. TB RE '**Double Shot**' (*G. Sutton 2000*) also had fall flowering from mid-October until mid-November. As temperatures were plunging on November 19th, Ruth cut bloomstalks on BB

Again And Again TB
(S. Innerst 1999)

Bonus Mama TB
(B. Hager 1990)

Champagne Elegance TB
(O.D. Nicwonger 1987)

Feed Back TB
(B. Hager 1983)

Rosalie Figge TB
(J. McKnew 1993)

RE **'Love Goes On'** (D. Spoon 2004), and TB REs **'Bonus Mama'** (B. Hager 1990), **'Reiterate'** (J. Nelson 1988) and **'Mariposa Autumn'** (R. Tasco 1999). The varieties mentioned in the report were planted in summer of 2015 except for **'Champagne Elegance'** (fall 2014) and **'Mariposa Autumn'** (summer 2016).

Rosemary Trompeter from Darien, CT had some nice median fall bloom to report. The IBs lead the way with October flowering on **'Blessed Again'** (F.P. Jones 1976), **'Concoction'** (M. Byers 1991), **'Constant Companion'** (C. Marsh 1995). **'Fast Forward'** (J.T. Aitken 2002) and **'Low Ho Silver'** (M. Byers 1989). SDB RE **'Jewel Baby'** (E. Hall 1984) rebloomed in late October. TBs **'Feed Back'** (B. Hager 1983), **'Immortality'** (L. Zurbrigg 1982), **'Corn Harvest'** (C. Wyatt 1977) and **'Rosalie Figge'** (J. McKnew 1993) flowered throughout October. TB RE **'Over And Over'** (S. Innerst 2001), planted on August 30th, had blooms on October 10th. Wow!

Fall cool season rebloom was in full swing at Presby Memorial Iris Garden in Montclair, NJ by mid-October. A garden tour destination for the 2016 AIS National Convention, some newer rebloom varieties had to be dug and reset from temporary guest beds for the meeting. Part of the remontan collection was left undisturbed and turned in pleasing fall flowering. By mid-October TBs **'Autumn Tryst'** (J. Weiler 1993), **'Feed Back'** (B. Hager 1983), **'I Do'** (L. Zurbrigg 1974), **'Polar King'** (T. Donahue 1939), **'Queen Dorothy'** (E. Hall 1984) and **'Uriah the Hittite'** (B. Miller 1979) were in flower. On the median side, SDB RE **'Baby Blessed'** (L. Zurbrigg 1979) took top honors with flowering from September through October. SDB RE **'Third Charm'** (J. Weiler 1982) and IB RE **'I'll Be Back'** (J.T. Aitken 2004) had October blooms.

By the end of October, TBs **'Presby Honors September'** (J. Roberts 2004) and **'September Buttercup'** (G.P. Brown 1962) were

in flower. Garden manager Dennis Hillerud mentioned additional varieties had developing bloomstalks. Presby, however, closes to the public on October 30th, so no further reporting was available prior to season ending frosts in early November.

Linda Mann from Kingston, TN had stellar rebloom on TB RE **'Summer Fantasy'** (G.P. Brown 1965) from July until November. Linda also reported flowering in her garden on TB RE **'Oxmoor Hills'** (J. Ennenga 2004) during October and November. Mann continues doing extension hybridizing for cool season rebloom. She mentioned summer flowering on some older seedlings and October bloom on some newer ones.

As this report is being written in mid-March, selected SDB RE seedlings and named varieties are blooming on short bloomstalks. Despite the groundhog's prediction, Central Virginia experienced its warmest February on record. Daytime temperatures rose above 70°F on a whopping ten days during the period. The unseasonable warmth led to early flowering on forsythia, ornamental cherries and crabapples, magnolia and Japanese quince halfway through the month. Normal bloom is mid-March.

A developing bloomstalk on TB Re **'Pink Attraction'** (E. Hall 1988) survived multiple hard frosts to bloom indoors in mid-March. Another one is now growing in its place. A few more stalks are suddenly appearing on additional tall bearded cool season rebloom varieties and seedlings. However, there is significant danger for April hard frosts.

With strong germination in holdover seed pots from 2015 cross pollinations, the sting of another sub-par breeding season, particularly for cool season rebloom tall bearded, is diminished. All attention will shift to seedling rebloom this summer and fall. It is hoped there will be some surprises to report for the next *Recorder*. Stay tuned.
